EDUCATION & COURSEWORK

San Francisco State University

San Francisco, CA

Bachelor of Science in Molecular Cell Biology, Minor in Computing Applications and Chemistry

Aug 2024 – May 2027

- **GPA:** 3.90
- **Relevant Coursework:** Protein Modeling & Deep Learning, Organic Chemistry I & II & Lab, Machine Learning for Data Science, Calculus I, Data Science for Personalized Medicine, Data Structures for Data Science, Genetics, Microbiology, Molecular Cell Biology
- **Ongoing Coursework:** Biochemistry I, Molecular Genetics, Evolution
- **Certificates:** Certificate in Data Science and Machine Learning for Biotechnology
- **Awards:** NIH U-RISE Scholar, Genentech-PINC Scholar, Dean's List, Ridge Vineyards Academic Award

EXPERIENCE & LEADERSHIP

NIH U-RISE | Swei Lab

San Francisco, CA

Undergraduate Researcher

November 2025 – Present

- Currently investigating how puma activity influences top-down control of tick populations and Lyme disease transmission risk in California oak woodlands through field and ecological data collection.
- Trained in molecular and field techniques including PCR, gel electrophoresis, and biological sample processing for disease detection and analysis.
- Conducting field sampling of predators, ticks, and environmental variables to support disease-risk modeling.
- Analyzing ecological and epidemiological data using Python, alongside literature review on vector ecology and host-pathogen interactions.

GEN-PINC

San Francisco, CA

Fellowship

August 2024 – Present

- Protein Modeling and Deep Learning, including transformer models (ESM) and generation for biological sequences
- Completed advanced coursework in Machine Learning for Data Science and Protein Deep Learning, focusing on model development and applications in biological data.
- Conducted gene-finding analysis using DNA sequences from FASTA files, applying core bioinformatics techniques.
- Integrated AI/ML approaches with bioinformatics workflows, strengthening ability to work across computational and biological fields.

WonderWorks Lab

Burlingame, CA

Lead Instructor

January 2026– Present

- Lead STEM-based workshops and hands-on learning experiences for students, integrating arts, science, and engineering.
- Collaborated with W.W.L. team to adapt project-based learning activities for community events and classroom settings.
- Supported curriculum planning, material prep, and interactive demonstrations to ensure an educational environment.

Kings Swim Academy

San Mateo, CA

Swim Teacher | Deck Supervisor

May 2022 - November 2025

- Monitored and adjusted pool chemical levels, ensuring proper pH balance and chlorine concentration.
- Teach swimming and water safety to individuals of all ages, promoting physical health and injury prevention.
- Developed customized lesson plans and hosted monthly parent meetings regarding their child's progress.

PROJECTS

NutriAi

- SF Hacks 2025, Utilizing Google Gemini, developed an AI-powered tool to assist users in making healthier food choices by analyzing nutritional data and providing personalized recommendations using machine learning and natural language processing techniques.

RELEVANT SKILLS

Skills: Deep Learning, Protein Modeling, Machine Learning, PCR, Gel Electrophoresis, Python, Adobe Photoshop, Microsoft Office, Google Sheets, Teaching, Chinese Proficient, Communication, Red Cross First Aid/CPR/AED Certified
